Gignoux-Wolfsohn lab intake form

Mentor's cell number is [], put this in your phone for emergencies/travel/etc Sarah's cell number is (610)724-3602

Name:Tani Valdez Rivas

Pronouns:She/Her/Hers

Date of Birth:April 23, 2000

Phone number:(919) 748-0605

Primary email:tanya_valdezrivas@student.uml.edu

Alternate email:tani.valdezrivas@outlook.com

What email do you want google drive shared with? tani.valdez101@gmail.com

Emergency contact (name, relationship, phone number): Lundy Valdez (919) 885-6117

Allergies/dietary preferences: Allergies: Pine nuts Dietary Restrictions: Vegetarian

Favorite snacks:Cheese-Itz

The one thing I need most from a mentor is (explain): Honest and constructive feedback in a timely manner. I had instances where a mentor did not reply or waited to provide feedback when I was studying for finals and was completing other projects that had identical due dates. It caused a lot of stress and was overwhelming.

The top three things that motivate me are: 1. Success 2. Discovery 3. Fun

These are ways I receive feedback best: - When comments are specific - When mentor can highlight some starting resources that I can learn and use - Direct and Honest

I do my best to work well with everyone, but these are a few things that I find difficult to work with: - People disrespecting my time; repeated ignoring/missing meetings - Refusal to accept feedback - Not completing their work and not communicating that

When I am upset or struggling in the workplace, this is how I tend to express it: I typically do verbalize when I am struggling or upset, but when my comments are dismissed or disregarded, I usually shut down or become quiet.

Colleagues and supervisors can best support me in the following ways: - Acting as a support system (through emotional encouragement or providing expertise) - Providing feedback - Being real when it comes to my work or behavior

Anything else Sarah should know about you: I am very excited to be joining the lab! It might be a bit of adjustment period becoming a student and researcher again but I will make sure to always try my best and be present!

I have read and agree to abide by the lab code of conduct. I will bring any questions or concerns about the code of conduct up with Sarah.
