

Gignoux-Wolfsohn Lab Graduate Agreement

Working style and commitments

When not required to be on campus for lab work or meetings, I will primarily work from (lab, office, library, home, mix): Home

I work best on a (variable/fixed) schedule: Fixed schedule, but I am comfortable working on a variable schedule

In order to contribute to the collaborative culture of the lab, I will (check all that apply, add other ideas) -

- ☒ arrange times to meet with undergrads
- ☒ be in the lab at set times to answer others questions
- ☒ answer questions on slack
- ☒ ask questions on slack
- ☒ make sure to be approachable & personable to undergrads

Aside from scheduled meetings, I will check in with my mentor (frequency of checkins e.g. daily, as needed):
For right now, as needed. But, as I start the program and start to understand my knowledge gaps, I will communicate more frequently.

I would like my mentor to check in with me (e.g., as needed, only during scheduled meetings, daily):
As needed!

I prefer to receive emails (only during business hours or anytime):
Anytime!

I prefer to receive slack messages (only during business hours or anytime):
Anytime!

Achievements from last summer/semester (if applicable):

Goals for this summer/semester:

Identify my knowledge gaps in general subjects and start preparing for next semester courses to ensure I am not overwhelmed.

Skills I want to learn:

Re-learning lab skills that will be more applicable to me.

Research goals:

For the summer I want to understand more about local environmental conditions and stressors and how that impacts aquaculture. As I gain a better understanding regarding genetics and techniques that farmers use to prevent/lessen winter mortality, I want to find which genes are regulated to help determine which farming practices will lead to higher yield and marketability.

Writing goals:

Work on developing grant/fellowship writing skills as I have only have experience writing abstracts.

Experience I want to gain:

Working with a variety of stakeholders and learning how to independently communicate with them

Subjects I want to learn more about:

- Local aquaculture history
- Molecular and genetic biology

Strengths that I will use to achieve my goals:

I have a strong background in ecology and coding and I am capable of learning new coding packages.

Areas I could use improvement in as a scientist and colleague in order to achieve my goals:

- Be less shy of asking for help
- Offer to help others with their project to gain fundamental lab skills

Future

I am considering the following careers:

- Resource Management
- Researcher in wildlife conservation
- Lab Manager

I would like to learn more about the following opportunities:

- Fellowships
- Ecological/Genetic Conferences
- Local conferences
- Engagement opportunities to me local scientist within my field
